Here is a map of all the EFCR surface water locations. EFCR-06 and EFCR-07 are also near Cottonwood Creek.

Britt:

EFCR-01 is near Cottonwood Creek. I am not able to find a map that shows EFCR-06 and -07. Where are these sampling points?? Are you able to share a map that shows these locations?

Greg

They are planning to be at EFCR-01, -06, and -07. The road to Doud Springs, River Ranch, Lower Bryant Creek became much more washed out during the winter so we are using UTV's to get to all these locations. You will not be able to get to locations with a 4x4 vehicle.

Britt:

Where will the crew be on Wednesday, and will I be able to get there in a 4wd vehicle?

Hi Greg,

For staffing reasons, we have postponed the hydrocarbon sampling at Camp Isbell until early July. We are not sampling at Doud Springs in 2017 but we are still sampling at the East Fork Carson River Surface water locations this week starting today through Wednesday. Let me know which day you would like to observe that task and I'll let you know which EFCR locations they are planning to be at for sample collection.

Hi Britt!

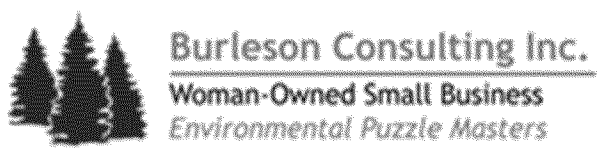

Are the Doud Springs sampling and Isbell Camp TPH investigations still anticipated to occur this week? EPA has asked me to coordinate a site visit to observe one or both of these activities.

Thank you,

Greg
